

# NAIT SYSTEM RELEASE 37

SCHEDULED RELEASE DATE 08<sup>TH</sup> MARCH 2020

## RELEASE NOTES

---

This release introduces and enhancement to an existing email notification; the ability to edit a NAIT location details without altering the map; the addition of the port of export to export declarations, and the option to see bulk test milk results for *Mycoplasma bovis*.

## DETAILS OF NEW/ENHANCE FEATURES

---

### *Location details enhancement*

Farmers can now add/edit information such as stock numbers and production types for their NAIT numbers without needing to navigate through the map first.

### *“Broken Chain” notification enhancement*

The broken chain notification will now only generate in situations where a PICA’s obligations have been met.

The notification now includes a list of all animals that triggered the notification at the bottom of the email.

### *Port of Export*

As per the amendment in the NAIT Act 2012, all animals that are marked as exported must now have their port of export identified as part of the declaration. Current ports listed are Timaru, Napier and Taranaki.

### *Bulk Test Milk*

Farmers who have filled in and submitted a consent form will now be able to see the results of their milk tests for *Mycoplasma bovis*.
