

# NAIT SYSTEM RELEASE 33

Scheduled release date 24/11/2019

## RELEASE NOTES

---

This release introduces a new email notification. A person in charge of animals (PICA) will be notified when an animal is removed from their account.

## DETAILS OF NEW /ENHANCED FEATURES

---

- When a movement is recorded that causes a broken link in an animal's movement history, the PICA for the animal's last-known NAIT number will receive a notification.
- The notification encourages the PICA to either:
  - Record missing movements for animals sent from their NAIT location, or
  - Alert OSPRI to potential errors.
- This notification is classed as 'non-essential'. Users that have set their preferences to receive only essential notifications will not receive this email.
