NAIT SYSTEM RELEASE 29.1

Scheduled release date: 20/03/2019

RELEASE NOTES

This release sees changes to the available reports and email notifications sent to farmers; the farm enterprise type now includes more options; known NAIT location land parcel selection bugs have been addressed; and known user permission bugs have been addressed.

DETAILS OF NEW/ENHANCED FEATURES

− PICA farmer users now have the option to opt into receiving an account summary report. This is a weekly report received via email that shows activity on the farmers account.
− 'Action required' email notifications are now classified as 'Essential' notifications. A user who has selected to receive essential email notifications only will now receive notification when action is required on their account.
− The option 'other' is removed from the location type options for PICA users.
− Milk production is now available as an Enterprise type.
− The Nait.co.nz links now direct to Ospri.co.nz.
− When editing a NAIT location, the 10km roving circle validation is displayed correctly.
