

NAIT SYSTEM RELEASE 30

Scheduled release date: 19/05/2019

RELEASE NOTES

This release introduces new functionality to allow the entry of a reason for rejecting movements; new reports have been developed; user declaration issues have been addressed; known bugs were addressed to improve the usability of the NAIT system.

Additional updates have been made to the identification of animals associated with a program. (i.e. AngusPure)

DETAILS OF NEW/ENHANCED FEATURES

- PICA users can now supply a reason when a sent or receive movement is rejected. The reason will be displayed to the PICA who initiated the movement.
- PICA users can now view the movement history of multiple animals through the 'Animal Registration & Movement History Report'.
- The wording of declarations has been changed to reflect the correct context when NAIT number updates are performed by another user on behalf of a PICA.
- Tags can now be flagged as associated with a program by tag manufacturers.
- The identification of animals included in a program is now automatic, previously this was manually entered by the PICA farmer.
